

NCT

10 kVA - 160 kVA

- Input voltage 380Vac ± 20% (Three phase + N + G)
- Output voltage 380Vac ± 1% (Three phase + N + G)
- Zero transfer time
- Pure sine wave
- Harmonic Distortion less than 3% at linear load

3 PHASE INPUT/OUTPUT ONLINE UPS WITH BUILT-IN PARALLEL FEATURE

- True On-line Double Conversion
- Advanced DSP (Digital Signal processor) technology and make UPS more reliable
- Flexible parallel technology applies to kinds of loaded system, like stand-alone, 1+1, N+1
- High efficiency, more than 98% (use the ECO work pattern)
- System has passed tests for short circuit and 2kVA high voltage insulation.
- Isolation with output transformer reducing the direct interference of waveform current and city electricity
- 6-pulse or 12-pulse (option) adjust the input power factors effectively and restrain power supply pollution from UPS
- Quick response, precise, credible and steady.
- Big touch screen LCD with UPS work stimulation flow chart Thai/English display
- Powerful intelligent monitoring function, providing RS232 or RS422, connecting points and parallel ports.
- SNMP/HTTP monitor capability (option)
- For many applications such as bank, securities, communication engineering, transportation & industrial automation, etc.
